

Volker Osdoba

With more than 30 years working in mechanical engineering and plant construction, Volker is familiar with all branches of the production and process industry.

During his knowledge of management and his leadership experience in medium-sized companies and corporate groups and nearly 20 years in the responsibility as Managing Director in Switzerland and Germany, he is the perfect match for every project along the value chain of an industrial company.

Volker has extensive experience and success in business development, mergers & acquisitions, outsourcing, restructuring of business units, development and marketing of innovative service products, project management, process optimization and digitalization.
